

Example from a open-source project

Lines of source code	before	after
json	332 124	58 023
python	147 059	147 059
javascript	67 066	67 066
specifications		8 719
templates		408
total	546 249	280 867
<i>Percent generated code</i>		49%

Settings	
Manually written lines of code per hour	10
Internal cost per hour (SEK)	550
Average # of bugs per 1000 code lines	2
Average hours to correct a bug	4
Number of programmers in the team	20

Result	before	after
Total programming time in hours	54 625	28 087
Total support time in hours	1 092	562
Total internal code in SEK	30 644 569	15 756 639
Number of weeks spent programming	77	40
<i>Savings (SEK)</i>		14 887 930
<i>Quicker delivery (weeks)</i>		38
<i>Reduced development time</i>		51%
<i>Quality improvement</i>		94%
